California State Bill Threatens To Tax Entire Business and General Aviation Service Industry

NATA is carefully monitoring [California Assembly Bill No. 1963](#), introduced by Assemblywoman Alyson Huber (D-10), which calls for a revision in tax rates imposed under the Personal Income Tax Law. The bill would impose a four percent sales and use tax on the privilege of selling services, including necessary medical services and services relating to agriculture.

NATA is concerned that this could also apply to the services of aircraft management companies as well as on-demand Part 135 air taxi services in the state. The association is monitoring the bill and will keep members informed of further developments.
